This warrant article has no tax impact.

This warrant article is put in place in case the collective bargaining agreement between the support staff and the school board is not supported by the voters at the District Meeting. If this warrant article is approved, the support staff and school board could renegotiate a new contract agreement to bring to the voters at a later date. If the CBA is supported, this warrant article will be withdrawn.

#### Warrant Article 7- Full Day Kindergarten

To see if the Wilton-Lyndeborough Cooperative School District will vote to approve expanding of the current kindergarten program to full day and to raise and appropriate the sum of \$117,745 for this purpose. Such cost to be offset by revenues which may be available by the State of New Hampshire on an annual basis. This article is an individual warrant article and does not include appropriations contained in special or other individual articles addressed separately. (Majority vote required)

Recommended by the School Board Not Recommended by the Budget Committee

Tax impact Lyndeborough - \$0.08 Tax impact Wilton - \$0.09

The costs to the district in implementing a full day kindergarten program would be \$117,745. Costs would include:

- ► 1 Full time kindergarten teacher
- .5 Preschool teacher
- ▶ 1 part time food service worker
- Furniture

The district can anticipate additional revenue from the state in the amount of \$60,200 to offset the cost of the program.

This would make the net cost to the tax payer \$57,545. This would be the amount that would affect the tax payer.

The strategic planning committee for the school district researched this topic. The committee was made up of three school board members and two budget committee members with the Superintendent present as a resource to provide information to the committee.

The committee met throughout the fall looking at research, national data, state data, and district data.

The consensus of the committee was to make a recommendation to the school board to bring a full day kindergarten plan to the voters as a warrant article.

The school board chose to support this warrant article for the following reasons:

- Internal district data showed that in the current school year, more than 50% of first graders began school in the fall without the basic skills to be ready to learn.
- Internal district data shows that as of January, all the students in this year's kindergarten would not be ready to read in the first grade.
- The increase to a full day program would double instructional time for students giving them the time to gain the essential skills in being ready to read.
- The increase in time would better prepare students for the rigor of a full day of first grade.
- Our students are compared to other students in the state, 70% of whom have full day kindergarten available as well as nationally.
- Students would be exposed to music, art, and physical education as part of this program.

The school board came to the consensus that by adding additional instructional time, our students would enter first grade ready to read at a much higher rate. This level of readiness has the potential to succeed in first grade and beyond. There is a potential to decrease the need for contracted services in speech and reading with this program. The district will also be better able to identify students earlier who have learning issues. Early identification can lessen the need for long term services.

The annual cost to the district would be long term, but the consensus of the board felt that the cost of the this would be out weighed by the long term benefit to our students.

The consensus of the board was also that the positive effects on a student who has confidence in their educational ability is hard to quantify with a dollar figure.
