Kevin P. Verratti, Director of Technology

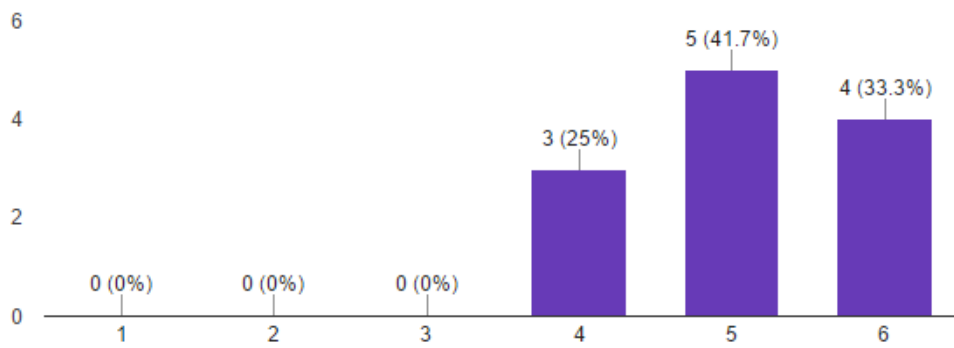

Technology School Board Report  
4/11/2017

- A power outage at FRES caused downtime and several pieces of equipment were damaged. The core router, cable modem and firewall were all replaced under warranty and at no charge to the district. Working with the facilities department power requirements were addressed and new outlets from the generator were installed. New battery backup units were installed in every wiring closet in order to condition the power coming in to the equipment and to provide a safety net in case of any lag time for the generator to cycle on.
- New battery backup units were installed in the WLCS closet to provide conditioned power in the event of a brown out. No generator is available at the WLCS site to provide failover power during an outage.
- SAU/LCS power systems were investigated and existing generator and battery backups were deemed adequate for their use and design.
- Currently we are evaluating both phone and internet service contract options to provide better class of services to the district at appropriate price points for our region.
- Our website host is migrating to Amazon Web Services (AWS) and requires a change to our SSL certificate. Our host does not anticipate that this will cause any downtime.
- 27 para-educators and aides joined me on March 24<sup>th</sup> for a two-hour training session on Chromebook utilization in the classroom. Attached is a copy of their feedback from the training, there was a very positive response overall.

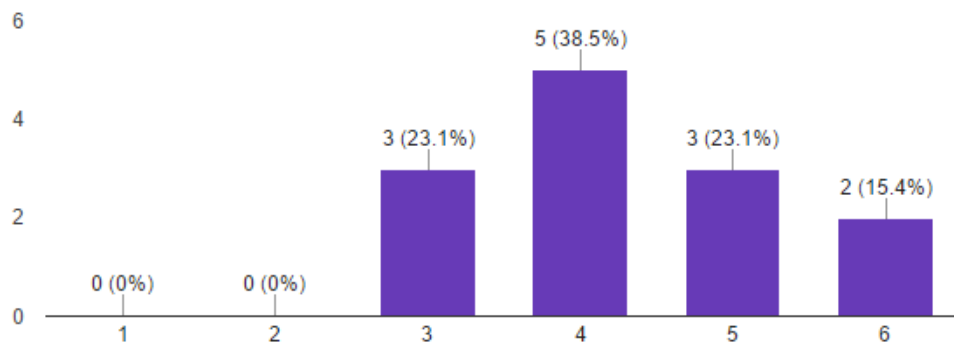

Respectfully,

Kevin P. Verratti  
Director of Technology  
SAU #63

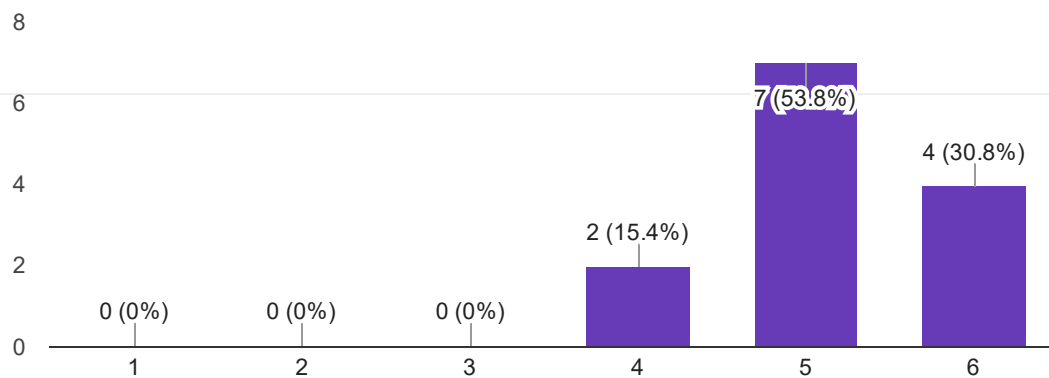

Was the level of instruction appropriate? (12 responses)

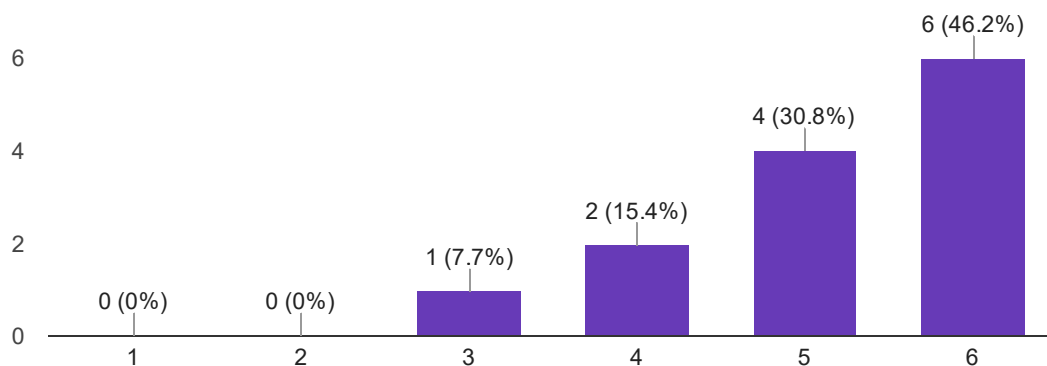

Was the pace of the training program appropriate? (13 responses)

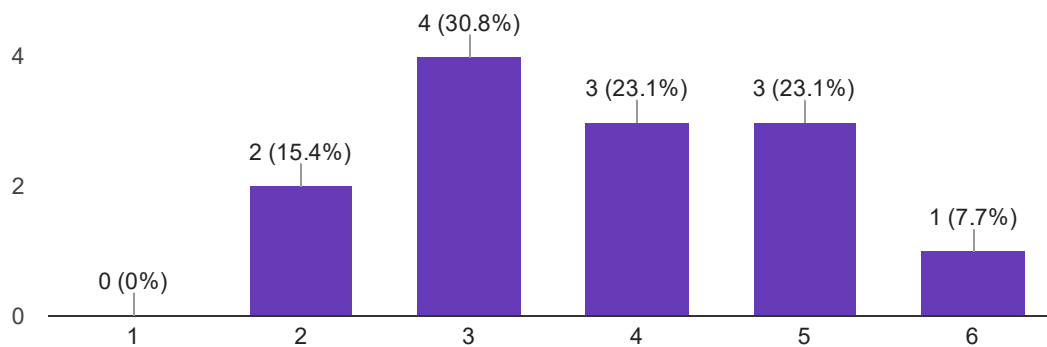

Did this training meet your expectations? (13 responses)

Was the length appropriate? (13 responses)

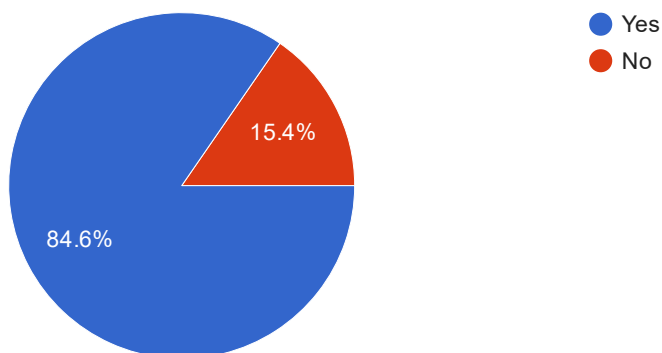

To a large extent was the training program relevant to you? (13 responses)
