Policy Committee Report

Our September meeting was very productive; the committee spent time addressing:

1. Recommendations from the School Board.
 - a. Policy ADB was reviewed again and the committee has presented it tonight for a second read with some edits. Our recommendation is to continue moving forward with the new combined policy and to withdraw the related policies that are now included in ADB (GBED and JICG)
 - b. Policy GBJ was researched further and we received follow up from the NHSBA lawyer. Our recommendation at this time would be to withdraw the policy in its entirety, as it is not a required policy and the content of it is included in EHAB and EHB both of which are currently under review in subcommittees.
2. Technology Policies:
 - a. Nick Buroker attended our meeting to review the proposed policy EHAB- Data Governance and Security. The creation and adoption of this policy will bring us into compliance with HB 1612. We are in the process of researching one additional question and it should be completed and ready for Board review after October's Policy Committee meeting.
 - b. We also discussed the Technology Audit that the Policy Committee had completed over the summer. It was identified that some policies contained antiquated language and will need updating. It was also recommended that the Tech Committee look at policy EDC and related documents EDC-R1 and EDC-R2. This is not a required policy and the Technology Department has an asset management system that they currently use, the committee questions if this would be more appropriate to just withdraw and keep it in the procedure.
3. We have completed the edits on policies GBCD; IHAM; IHAM-R; JICK; JI. These policies will be coming to the Board once the policies currently under consideration are completed.
4. The policies related to legislative changes that are related to public education (HB 1035; HB 1244; HB 1663; SB233; SB 234; SB 394; HB 1178) are still under review and rewrite at NHSBA, the committee is still waiting to address them following the anticipated webinar.

Respectfully submitted,
Brienne Lavalley
Policy Committee Chair
